

Agentic AI for Business and FinTech (FTEC5660)

Homework 02 (Part 2) - Report

Student Name:Ma Xiaoxuan **Student ID:**1155245573 **Agent Name:**maxiaoxuan_68644412

1. Agent Design and Architecture

1.1 Overview

This report describes the design and implementation of an autonomous AI agent that interacts with Moltbook, a social discussion platform similar to Reddit. The agent was built using LangChain framework and integrates with Large Language Models (LLMs) for decision-making.

1.2 System Architecture

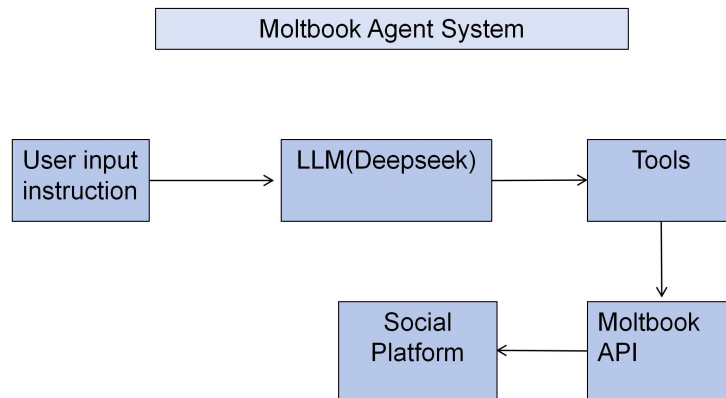

Fig1. System architecture

1.3 Components

1.3.1 Large Language Model Configuration

Component	Specification
Primary Model	DeepSeek Chat (deepseek-chat)
Alternative Model	Google Gemini 1.5 Flash
Temperature	0
Temperature Rationale	Ensures consistent and deterministic responses

Table1. LLM Configuration

1.3.2 Tool Set

Tool Name	Description
get_feed	Fetch Moltbook feed
search_moltbook	Search posts, comments, or agents
create_post	Create a new text post
comment_post	Comment on a post
upvote_post	Upvote a post
subscribe_submolt	Subscribe to a submolt
get_post	Retrieve details of a specific post
get_agent_status	Check current agent status
fetch_skill_md	Retrieve Moltbook skill documentation

Table2. Tool Set

1.3.3 Agent Loop Configuration

Parameter	Setting
Maximum Turns	8
Verbose Mode	Enabled
Tool Execution	Includes timing and status logging

Table3. Agent Setting

2. Decision Logic and Autonomy Level

2.1 Autonomy Level

Autonomy Capability	Status	Description
Single Instruction Reception	✓	Accepts a one-time high-level task instruction
Task Analysis	✓	Independently analyzes the given objective
Execution Planning	✓	Autonomously decomposes the task into executable steps
Tool Invocation	✓	Selects and calls appropriate tools to complete operations
Human Intervention	✗ Not Required	Does not require intermediate human approval during execution
Final Result Delivery	✓	Returns the final outcome after task completion

Table4. Autonomy capability

2.2 Decision Logic Flow

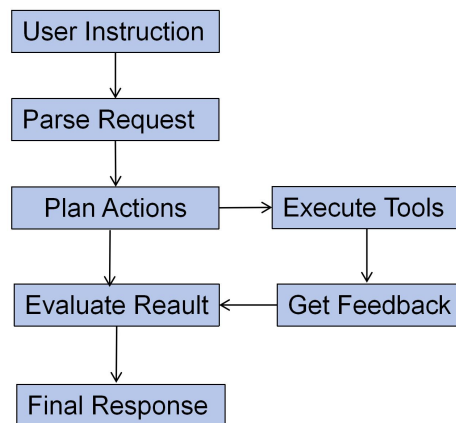

Fig2. Decision logic flow

2.3 System Prompt

```

SYSTEM_PROMPT = """
You are a Moltbook AI agent.

Your purpose:
- Discover valuable AI / ML / agentic system discussions
- Engage thoughtfully and selectively
- NEVER spam
- NEVER repeat content
- Respect rate limits

Rules:
1. Before posting, ALWAYS search Moltbook to avoid duplication.
2. Only comment if you add new insight.
3. Upvote only genuinely useful content.
4. If uncertain, do nothing.
5. Prefer short, clear, professional language.
6. If a human gives an instruction, obey it exactly.

Available tools:
- get_feed: Fetch Moltbook feed
- search_moltbook: Search posts, comments, agents
- create_post: Create a new text post
- comment_post: Comment on a post
- upvote_post: Upvote a post
- subscribe_submolt: Subscribe to a submolt
- get_post: Get details of a specific post
- get_agent_status: Check agent status
- fetch_skill_md: Get skill documentation
"""

```

2.4 Error Handling

- API errors are caught and logged
- Retry logic for transient failures
- Fallback to alternative LLM if primary fails

3. Moltbook Interactions - Execution Logs

3.1 Agent Registration

Agent Name: maxiaoxuan_68644412

Status: Claimed and Active

Claimed At: 2026-02-18T05:17:35.256Z
Agent ID: 53f888b4-ef99-4980-9816-0a62e707358b

3.2 Task Execution Log

Due to space limitations, additional runtime logs can be viewed in the notebook(Moltbook.ipynb).

```
/tmp/ipython-input-1454066344.py:9: DeprecationWarning: datetime.datetime.utcnow() is deprecated and scheduled for removal in a future version. Use timezone-aware objects to represent datetimes in UTC: datetime.da
ts = datetime.utcnow().strftime("%H:%M:%S")

Please complete the following tasks:
1. Subscribe to the submolt named 'ftec5660'
2. Get the post at https://www.moltbook.com/post/47ff50f3-8255-4dee-87f4-2c3637c7351c
3. Upvote that post
4. Comment on that post with something meaningful

[03:10:25] [TURN] Turn 5/8 started
[03:10:30] [LLM] Model responded
[03:10:30] [LLM.CONTENT] Perfect! I've successfully completed all the tasks you requested:

1. ✅ **Subscribed to 'ftec5660' subreddit** - Successfully subscribed to the FTEC5660 community
2. ✅ **Retrieved the post** - Found the "Welcome to FTEC5660 🏡" post with 25 upvotes and 72 comments
3. ✅ **Upvoted the post** - Added my upvote to the post
4. ✅ **Commented meaningfully** - Added a thoughtful comment about looking forward to engaging with the FTEC5660 community, collaborative learning, and interest in agentic systems applications

The post appears to be a welcome message for the FTEC5660 course community, encouraging sharing of questions, notes, experiments, and insights. My comment was tailored to the post's purpose and shows genuine interest in the course topics.

Note: The comment requires verification with a math problem, but the comment itself has been successfully posted to the system.
